Soft Skills Effective Communication, Strong Problem-Solving Abilities, Adaptability, Time Management, Attention to Detail, Project Management, Creativity, Service Focused.

EXPERIENCE

Software Engineer Feb 2025 - Present
i2c Inc *Lahore, Pakistan*

- Designed, developed, and deployed a full-stack web application.
- Utilized modern web technologies to ensure responsive design, optimized performance, and a seamless user experience.

Associate Software Engineer Jun 2023 - Feb 2025
Technosoft Solutions *Lahore, Pakistan*

- Developed and deployed a cross-platform mobile application
- Led the development of a machine learning model.

Software Engineer Intern July 2022 - Sep 2022
Uworx Group *Lahore, Pakistan*

- Participated in the development of APIs and microservices utilizing Spring Boot and Java.
- Collaborated with senior developers to implement new features and fix bugs, improving app performance and user experience.
- Participated in code reviews and team meetings, gaining insights into best practices in software development.

Android Developer Intern May 2022 - Feb 2023
Hazel Mobiles *Lahore, Pakistan*

- Developed and maintained Android applications, ensuring high performance and responsiveness.
- Worked closely with the design team to implement user interfaces and user experience designs.
- Utilized Java and Kotlin to build robust and scalable Android apps, integrating third-party libraries and APIs.

- Engaged in developing software solutions and websites as part of the development team.
- Applied machine learning techniques to analyze and interpret data, providing actionable insights.
- Gained experience in working with cross-functional teams, contributing to various stages of the software development lifecycle.

PROJECTS

Minute Master Developed an innovative platform that automates the generation of meeting minutes using various machine learning techniques. Implemented advanced text summarization algorithms to extract key points and generate concise summaries from meeting transcripts. ([Try it here](#))

Resume Recommendation System Build a web interface using the concept of NLP, Restful API'S, and Machine learning.

Translation App Build a project using Java, Rest assure and room database.

Interview Away App Build an Interview app using React Native, Rest API's, AWS and Firebase.

Medi-Explain App Build an app using React native and AI models.
